

Amendments to the Specification:

Please replace paragraph [0047] with the following amended paragraph:

By using the rail as the sensor signal mounting base, all of the brackets have been eliminated. Also, every sensor is positioned by a single car-top mounted carrier. The expensive encoder has been eliminated. **Although described herein as separate and individual sensors that each receive a signal to measure separate properties, it will be appreciated that one sensor may accomplish a reading for all necessary properties.**
